Training description

Advance your expertise in spectrum management with the ITU Spectrum Management Training Programme (SMTP), a high-level learning programme developed by ITU and delivered through its partners. This modular programme covers both theoretical and practical aspects, from basic to advanced levels, catering to regulators, operators, policymakers, and professionals across technical, legal, and economic fields.

The scope of this course will cover an overview of the current traditional approaches to spectrum management and their limitations; new approaches to spectrum management focusing on spectrum authorisation regime to improve efficient and optimum use of the spectrum resources through adoption of advanced spectrum allocation, assignment and management techniques, and modern spectrum licensing management processes based on operational requirements and technical and economic viability. The scope will include mechanisms to promote flexile spectrum use, based on new approaches to managing spectrum commons such as dynamic spectrum access, whitespaces

access; licensing structures, the light licensing, authorisations processes, etc.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

How to pay for the training

This course is organized by African Advanced Level Telecommunications Institute (AFRALTI), an ITU Academy Training Centre, which will collect the training fees directly.
