## Description

Advance your expertise in spectrum management with the ITU Spectrum Management Training Programme (SMTP), a high-level learning programme developed by ITU and delivered through its partners. This modular programme covers both theoretical and practical aspects, from basic to advanced levels, catering to regulators, operators, policymakers, and professionals across technical, legal, and economic fields.

The scope of this course will cover an overview of the current traditional approaches to spectrum management and their limitations; new approaches to spectrum management focusing on spectrum authorisation regime to improve efficient and optimum use of the spectrum resources through adoption of advanced spectrum allocation, assignment and management techniques, and modern spectrum licensing management processes based on operational requirements and technical and economic viability. The scope will include mechanisms to promote flexible spectrum use, based on new approaches to managing spectrum commons such as dynamic spectrum access, whitespaces access; licensing structures, the light licensing, authorisations processes, etc.

## Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
