Description

While many individuals with disabilities are technologically savvy, persons with disabilities in general are faced with a digital gap. This is further compounded by digital gaps along lines of gender and socio-economic status, amongst others. These digital gaps need to be addressed, if we want to ensure that persons with disabilities do not miss out on the opportunities provided by the digital economy. To this end, this course will highlight the importance of delivering equal access to technology, resources and information for persons with disabilities to do their jobs efficiently and effectively. Additionally, this course will seek to foster participants' understanding of how exclusion from digital participation occurs and explore mitigation strategies and tools that enable inclusive participation in the digital world.

Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
