## Description

This course provides a comprehensive introduction to ICT standards and interoperability within ICT systems. Participants will gain an understanding of the organizations responsible for establishing these standards, as well as the national authorities that enforce them. The course will guide participants in self-monitoring practices to ensure compliance with both industry and regulatory

---

standards. Additionally, it will cover the penalties associated with non-compliance and clarify the distinct roles of various stakeholders in the field. Finally, the course includes an assessment of licensing cases based on predefined standards, equipping participants with the tools needed for informed decision-making in this area.

With the generous support of the Global Gateway initiative of the European Union, this course is offered for free for selected participants.

## Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
