Description

This course provides a concise, non-technical overview of the technologies and infrastructures supporting telecommunications, broadcasting, and audio-visual services. It explores trends driving

digital communications markets, emerging technologies, and their applications across sectors like agritech, fintech, and smart environments. Participants will gain a conceptual understanding of the digital technology landscape, market dynamics, and innovation, laying the groundwork for future-focused policy and regulation within a converging and competitive digital ecosystem.

With the generous support of the Global Gateway initiative of the European Union, this course is offered for free for selected participants.

Financial support available

Registration information

Document on registration information (English)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
