Description

This course explores the latest trends and innovations in digital technology and examines their implications for digital transformation. It covers topics such as artificial intelligence, blockchain, and the Internet of Things (IoT), highlighting their potential to drive innovation and disrupt traditional business models.

Through theoretical insights, practical examples from global initiatives, and hands-on exercises,

learners will develop strategies to implement emerging technologies and navigate digital change effectively within their organizations. The course aims to equip participants with the skills and knowledge needed to lead and contribute to digital transformation successfully.

With the generous support of the Global Gateway initiative of the European Union, selected applicants can participate free of charge. This includes accommodation, meals, and other organized activities for a comfortable and immersive learning experience. Participants or their organizations will be responsible for covering their travel expenses to Nairobi, Kenya and if necessary, visa application costs.

Financial support available

Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
