Training description

This self-paced training course provides an introductory exploration of the Information Mediator Building Block (IMBB), designed for individuals involved in driving digital transformation and enhancing government interoperability. Centered on the principles of secure, efficient, and standardized data exchange, the course highlights the critical role of information mediators in fostering connected digital ecosystems.

Through 7 comprehensive modules, participants engage with key concepts, tools, and methodologies, while developing practical skills to design, implement, and manage information mediators. The course emphasizes the importance of interoperability in advancing digital public infrastructure (DPI) and supporting whole-of-government approaches. Learners are equipped with the competencies to integrate the Information Mediator Building Block into diverse projects, enabling seamless data sharing across government agencies, private sector stakeholders, and international partners.

By understanding the value of secure and efficient data exchange processes, participants are empowered to drive impactful change in their digital development initiatives. This course ultimately supports the realization of sustainable, inclusive, and transparent digital ecosystems aligned with the UN Sustainable Development Goals (SDGs).

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to register

In order to register for the training, participants should:

1. Create an ITU Academy account [here](#)
2. Register for the course [here](#)

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
