Description

Due to high demand, applications for this training are now closed.

This summer school is designed to introduce participants to the concept of sustainable digital transformation through various subtopics, including emerging digital technologies, digital farming, and e-waste management.

Participants will become proficient in the use of the terminology related to digital transformation and sustainability through lectures and interactive sessions. Additionally, they will explore academic literature covering topics such as emerging digital technologies, sustainable agriculture, digital farming, e-waste management, and the intersection of Artificial Intelligence and sustainability.

With the generous support of the Global Gateway initiative of the European Union, participation in this training is provided free of charge for selected applicants. This includes accommodation, meals, and extracurricular activities. Participants or their organizations will be responsible for covering their travel expenses to Maastricht, Netherland and if necessary visa application costs. Participants or their organizations are responsible for covering the costs of travel expenses to and from their home country to city, country as well as visa expenses and insurance.

Financial support available

Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
