Training details

Modality: Online self-paced
Dates: Open
Training fees: $0.00
Language: English
Registration deadline:
Training code: 25OS500241MUL-E-D
Contact: ayush.shukla@itu.int

Training description

This self-paced training course offers a comprehensive introduction to the Digital Registries Building Block, designed for individuals involved in advancing digital transformation and promoting efficient data management and record-keeping in government services. Focused on the principles of data integrity, accessibility, and scalability, the course highlights the critical role of digital registries in enabling centralized, secure, and structured data storage within digital public infrastructure (DPI).

Through 7 interactive modules, participants explore key concepts, tools, and practical methodologies required to design, implement, and manage the Digital Registries Building Block. The course emphasizes the importance of interoperable registries, data standardization, and identity management, ensuring that participants understand how to create and support cross-government data ecosystems that cater to stakeholders from government, the private sector, and development partners.

Participants will develop essential skills to design and integrate digital registries into cross-government services. By mastering the core principles of the Digital Registries Building Block, participants are empowered to drive data-driven transformation and create transparent, efficient, and people-centric registry systems. This course supports the realization of sustainable, accessible, and trustworthy digital ecosystems, promoting the achievement of the UN Sustainable Development Goals (SDGs), particularly those related to good governance, inclusive service delivery, and accountable public administration.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to register

In order to register for the training, participants should:

1. Create an ITU Academy account here
2. Register for the course here
