## Training description

This training course will equip participants with the knowledge and tools to design and implement scalable, interoperable, and citizen-focused digital public infrastructure. Through an in-depth exploration of GovStack's modular building blocks, frameworks like PAERA, and real-world case

studies, this course offers practical insights into creating efficient e-governance systems. Participants will learn about digital identity, security, interoperability, and cross-border services, gaining hands-on experience with tools and sandbox environments to develop transformative digital solutions tailored to public sector and citizen-oriented needs.

With the generous support of the Global Gateway initiative of the European Union, participation in this training is provided free of charge for selected applicants. This includes accommodation, meals, and other organized and extracurricular activities. Participants or their organizations are responsible for covering the costs of travel expenses to and from their home countries to Tallinn, Estonia and visa application costs if applicable.
