Description

This training course focuses on equipping participants with foundational knowledge and practical skills in Spectrum Monitoring. It emphasizes the critical role of spectrum monitoring in ensuring efficient use of radio frequencies, addressing interference issues, and supporting regulatory compliance.

The participants will be equipped with the necessary skills to conduct spectrum measurements and analyze results, operate advanced spectrum monitoring and direction-finding equipment as well as identify and analyze interference problems in various scenarios.

Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
