Description

A practical and engaging course designed for professionals in telecommunications, this program offers a well-rounded introduction to key tasks, technical procedures, and essential tools used in modern spectrum monitoring.

It focuses on core concepts in spectrum monitoring, exploring regulatory frameworks and international best practices. Participants will become proficient in technical foundations, software tools & applications, via practical exercises and interactive real-world scenarios. During the five days of the training, activities will focus on getting hands-on experience with industry-standard spectrum monitoring equipment, learning fundamentals and to interpret measurement results towards mastering the fundamentals of spectrum monitoring.

Registration information

[Document on registration information (English)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
