## **Description**

This course aims to equip professionals with in-depth knowledge and practical skills to manage emerging threats and vulnerabilities in digital infrastructures. The curriculum explores governance

| and covers policy development, ethical standards and regulatory frameworks in cybersecurity to ensure organizations' compliance with the latest threats, risk assessment methodologies, and security best practices. In addition, participants will also learn to create a risk management plan and learn about post-incident activities such as forensic investigations, recovery methods, incident response planning which by the end of the course, will prepare the participants to take part in a wide range of threat management and incident response activities as cybersecurity operators. |
|---|
| With the generous support of the Global Gateway initiative of the European Union, this course is offered for free for selected participants.  |
| Registration information  |
|   |
| Document on registration information (English)  |
| Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.  |
