Description

The rise of generative AI, Web 3.0, and the metaverse is reshaping the creative industries, unlocking new possibilities for content creation, storytelling, and audience engagement. However, these innovations come with complex ethical, legal, and regulatory challenges.

The course equips professionals with the knowledge and tools needed to navigate this evolving landscape, ensuring the responsible and sustainable use of emerging technologies in the creative sectors. It allows learners to gain a strategic edge by understanding how cutting-edge technologies are revolutionizing the creative economy. Participants will learn to anticipate challenges, mitigate risks, and build collaborative frameworks that drive innovation while fostering ethical and sustainable growth.

Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
