Training description

This course is structured to provide mid and senior level officers working in governments, a nuanced understanding of spectrum policies, regulatory frameworks and emerging trends shaping the telecommunication industry. The course will cover spectrum management and assignment tasks, roadmap and strategies in line with ITU Radio Regulations. The course will also cover the spectrum audit process, pricing calculations of spectrum & monetization, spectrum auction, SUC assessment, spectrum harmonization, spectrum refarming, coexistence studies & identification of IMT spectrum, spectrum in satellite communications, best global practices and future strategies etc. Through real-world case studies, participants will gain actionable insights on SUC assessment and international best practices and trends.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The ITU Academy is the International Telecommunication Union leading platform for capacity development initiatives.
