Description

This course is structured to provide mid and senior level officers working in governments, a nuanced understanding of spectrum policies, regulatory frameworks and emerging trends shaping the telecommunication industry. The course will cover spectrum management and assignment tasks, roadmap and strategies in line with ITU Radio Regulations. The course will also cover the spectrum audit process, pricing calculations of spectrum & monetization, spectrum auction, SUC assessment, spectrum harmonization, spectrum refarming, coexistence studies & identification of IMT spectrum, spectrum in satellite communications, best global practices and future strategies etc. Through real-world case studies, participants will gain actionable insights on SUC assessment and international best practices and trends.

Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
