SWISS CYBER INSTITUTE

Training details

Modality: Online instructor led
Dates: *17 Mar 2025 - 17 Mar 2025*
Training fees: $0.00
Language: English
Application deadline: 13 Mar 2025
Training code: 25OI500281MUL-E-D
Contact: kristina.hojstricova@itu.int

Training description

This training is designed to equip professionals from Least Developed Countries (LDCs) with the skills and strategies needed to effectively prepare for, respond to, and recover from cyber incidents. This course covers the entire lifecycle of a cyber crisis—from identifying vulnerabilities and managing real-time attacks to post-incident recovery and legal implications. Participants will engage in hands-on simulations of real-world cyberattacks which will help them to develop quick decision-making and strategic thinking under pressure.

The course focuses on developing practical skills to handle high-pressure situations, emphasizing structured decision-making and clear communication during incidents. Participants will learn to

design and implement incident response plans, assess vulnerabilities, and understand the implications of cyber threats on organizational operations.

Training will be delivered under the Cyber for Good project.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.
