Capacity Building

Description

This course aims to inform telecommunications policymakers and regulators, particularly those in emerging and developing markets, about the multifaceted relationship between mobile technologies and climate change. It also discusses how the mobile industry is reducing its own impacts on climate change while also enabling climate action in other sectors. Furthermore, it details how policymakers can facilitate climate action across the mobile ecosystem and beyond.

Registration information

[Document on registration information \(English\)](#)

Unless specified otherwise, all ITU Academy training courses are open to all interested professionals, irrespective of their race, ethnicity, age, gender, religion, economic status and other diverse backgrounds. We strongly encourage registrations from female participants, and participants from developing countries. This includes least developed countries, small island developing states and landlocked developing countries.
