Training fees: \$0.00

Language: English

Application deadline: 01 Feb 2026

Training code: 26WS500332MUL-E-D

Contact: ituacademy@itu.int

Training description

This face-to-face training focuses on enhancing skills for using ICT statistics to design, monitor and evaluate public policies to achieve Universal and Meaningful Connectivity.

The course covers the role of digital public policies in achieving Sustainable Development Goals through Universal and Meaningful Connectivity, evidence-based ICT governance, and the use of ICT indicators such as measures of connectivity, affordability, and skills—for policy development and

evaluation. It also addresses the social, economic, and environmental dimensions of ICTs and explores challenges and opportunities in compiling, analysing, and disseminating ICT statistics in developing and transitioning countries.

Interactive sessions will focus on developing case studies informed by ICT statistics to generate insights and recommendations for policymaking.

With the generous support of the Global Gateway initiative of the European Union and the contribution of Cetic.br|NIC.br, this course is offered for free for selected participants. This includes accommodation, meals, and extracurricular activities. Participants or their organizations will be responsible for covering their travel expenses to Sao Paulo, Brazil and, if necessary, visa application costs.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.
