AI for increasing the efficiency of telecommunications/ICTs using the Whole Government approach

Organized by:

Training details

Modality: Face to Face

Location: Thimphu, Bhutan

Dates: 25 Sep 2025 - 26 Sep 2025

Training fees: \$0.00

Language: English

Registration deadline: 21 Sep 2025

Training code: 25WS500352ASP-E-D

Contact: akanksha.sharma@itu.int

Training description

Enhance the capacity and awareness among government officials and key stakeholders on artificial intelligence technologies for increasing the efficiency of telecommunications/ICTs and the development and implementation of related ICT standards within the ITU's mandate and core competencies especially those described in the PP Resolution 214 (Bucharest, 2022), Artificial intelligence (AI) technologies and telecommunications/information and communications technologies.

With the generous support of the Ministry of Internal Affairs & Communications of Japan, the workshop will focus on core concepts and fundamentals of AI for Bhutanese civil servants to be equipped and sensitized towards its governance, ethical aspects and possible risks. The course will include several global best practices and examples of AI applications from around the world for Bhutan to evaluate how AI can address its existing national challenges.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to register

In order to register for the training, participants should:

1. Create an ITU Academy account [here](#)
2. Register for the course [here](#)

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.

International Telecommunication Union
Place des Nations, 1211 Geneva 20
