Training fees: \$0.00

Language: English

Registration deadline: 10 Oct 2025

Training code: 25WS500360ARB-E-D

Contact: mustafa.almahdi@itu.int

Training description

This five-day training course, delivered over 2 days and is structured as follows:

The course is primarily based on the ITU/World Bank digital regulation platform and the ITU FCDO universal access and service financing efficiency toolkit with a focus on the following aspects: regulatory governance, evidence-based decision-making, regulatory sandboxes, emergency telecommunications and cybersecurity.

This training course aims to examine specific aspects of digital regulation and transformation to enhance participants' further knowledge of the issues at stake; therefore, the training course does not

provide an in-depth analysis of every regulatory aspect of digital regulation; however, it enables participants to get a deeper understanding and greater knowledge of specific policy and regulation aspects in a digital world, emergency communications and cybersecurity.

The training will be organized by ITU in collaboration with the Digital Regulatory Academy (DRA) of the Communications, Space and Technology Commission (CST) of Saudi Arabia, as part of ITU-Saudi Arabia Project on Assistance in telecommunication/ICTs to ITU regions.

This training will be conducted in English and is open to Somalia participants

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to register

In order to register for the training, participants should:

1. Create an ITU Academy account [here](#)
