Inatel

Training details

Modality: Online instructor led

Dates: 22 Jun 2026 - 10 Jul 2026

Training fees: \$0.00

Language: English

Application deadline: 31 May 2026

Training code: 26OI500362MUL-E-D

Contact: danielnunes@inatel.br

Training description

This 20-hour instructor-led online course offers a comprehensive view of satellite connectivity and its strategic role in bridging the digital divide. Designed for professionals involved in digital policy, regulation, and technology adoption, the course explores the different types of satellite systems (LEO, MEO, GEO), their technical characteristics, applications, and global regulatory frameworks.

Participants will gain the foundational knowledge necessary to understand, evaluate, and analyze satellite-based connectivity solutions and how these technologies can be effectively applied to enhance digital services, especially in remote and underserved regions.

With the generous support of the Global Gateway initiative of the European Union, this course is offered for free for selected participants.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
