Training details

Modality: Face to Face
Location: Geneva, Switzerland
Dates: *01 Jun 2026 - 04 Jun 2026*
Training fees: $0.00
Language: English
Application deadline: 23 Mar 2026
Training code: 26WS500418MUL-E-D
Contact: gustavo.fonseca-ribeiro@itu.int

Training description

Expanding school connectivity is not only a technical challenge, it is a governance and ecosystem coordination endeavour that underpins the digital transformation of education systems. This intensive, hands-on training explores how countries can design, govern, and scale school connectivity initiatives as part of broader digital public infrastructure (DPI) and e-government service reforms.

Over four days, participants will examine key components of digital governance from policy and institutional frameworks to multi-actor coordination, financing, and change management. Through a blend of theory lectures, interactive sessions, co-creation activities, and site visits, participants will engage with real-world examples of how digital infrastructure, leadership, and collaboration models can enable inclusive and resilient digital societies. The course will also introduce the role of DPI in education and the growing importance of public digital learning platforms, offering practical tools to design and implement locally relevant strategies for sustainable school connectivity, bringing examples from successful programmes worldwide.

Participants will leave with a shared understanding of how to align connectivity efforts with national digital strategies, strengthen inter-ministerial and public–private cooperation, consider the needs for DPI and digital learning platforms in the education context, and translate global principles into

actionable local roadmaps.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The ITU Academy is the International Telecommunication Union leading platform for capacity development initiatives.
