Training details

Modality: Online instructor led

Dates: 12 Oct 2026 - 25 Oct 2026

Training fees: \$0.00

Language: English

Application deadline: 10 Oct 2026

Training code: 26OI500427MUL-E-D

Contact: wangying@caict.ac.cn

Training description

Digital technologies are transforming societies and economies worldwide. This course covers the key emerging technologies in the digital future. This course will include 5GAdvanced, Artificial Intelligence, Green Cloud Computing, and resilient connectivity.

This course delves into the evolution of connectivity with 5G-Advanced and satellite internet, addresses the urgency of sustainable practice through green cloud computing, deciphers the strategic implications of Artificial Intelligence, and outlines frameworks for building resilient infrastructure and fostering digital cooperation.

This course offers a unique advantage by moving beyond theory to provide a practical, holistic view of the digital ecosystem. Participants will gain actionable insights from real-world case studies and evidence-based research, equipping them to navigate complex technological trends and their

socioeconomic impacts.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
