Location: Geneva, Switzerland
Dates: *11 May 2026 - 15 May 2026*
Training fees: $0.00
Language: English
Application deadline: 01 Mar 2026
Training code: 26WS500442MUL-E-D
Contact: gustavo.fonseca-ribeiro@itu.int

Training description

The *Multi-Sector Collaborative Regulation for School Connectivity* course is designed to empower government officials, regulators, and policymakers with an actionable understanding of how to effectively regulate school connectivity within a multi-sector decision-making and policymaking context. The curriculum is focused on deriving positive regulatory outcomes and creating an enabling environment that preserves investment-friendly laws and regulations. The course provides an overview of regulatory and policy challenges encompassing demand- and supply-side policies, supply-demand interdependencies, holistic planning, national stakeholder management, dispute resolution, cross-border collaboration, and case studies that highlight efforts to achieve ubiquitous Internet connectivity in schools.

Participants will be exposed to auxiliary and inter-linked policy and regulatory challenges such as national ICT sector taxation policies, infrastructure sharing, spectrum sharing, licensing frameworks, spectrum availability, utility service, construction permits and permissions, rights of way, and related fees. The course also highlights the importance of intra- and inter-governmental collaboration for school connectivity.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.
