AI governance in practice: developing secure and innovative frameworks

Organized by:

Funded by

Global Gateway

Funded by the European Union

Training details

Modality: Blended
Dates: *14 Sep 2026 - 18 Sep 2026*
Training fees: $0.00
Language: English
Application deadline: 30 May 2026
Training code: 26BL500445MUL-E-D
Contact: ituacademy@itu.int

Training description

This blended training course is designed for policymakers, regulators, civil society leaders, and professionals worldwide seeking to strengthen their skills in AI governance. It offers a comprehensive introduction to core AI concepts, ethics, cybersecurity considerations, and global legal and regulatory frameworks.

Through a preparatory online self-paced training course and in-person training, participants will engage in hands-on activities such as design thinking labs, simulations, journey mapping, and prototyping to explore the AI system lifecycle, identify governance gaps, test oversight tools, and co-develop national strategies. The self-paced component introduces core AI governance concepts and ensures a common baseline of knowledge ahead of the in-person sessions. Scenario-based exercises will address sector-specific challenges, risk mapping, and cross-border regulatory negotiations. By the end of the course, participants will have collaboratively developed a five-year AI governance roadmap tailored to their institutional or national context, aligned with international best practices.

The course is organized by the International Telecommunication Union (ITU) with financial support from the European Union's Global Gateway initiative. Participation is free of charge for selected participants and includes accommodation, meals, and organized activities in Geneva, Switzerland. Travel and visa-related expenses, if applicable, remain the responsibility of the participants or their sponsoring organizations.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The ITU Academy is the International Telecommunication Union leading platform for capacity development initiatives.
