RealTyme

Training details

Modality: Online instructor led
Dates: *01 Apr 2026 - 06 May 2026*
Training fees: $0.00
Language: English
Application deadline: 25 Mar 2026
Training code: 26OI500446AFR-E-D
Contact: Training@realtyme.com

Training description

As governments increase reliance on digital platforms and cloud services, **digital sovereignty is defined by control—not intent**. This course provides a practical framework to assess and strengthen national digital sovereignty across four enforceable layers.

It enables participants to understand digital sovereignty as an operational and governance concept, identify sovereignty risks in existing digital systems, and apply practical frameworks to strengthen control, trust, and national autonomy in the digital environment.

The course is designed for policymakers, regulators, and senior public-sector leaders seeking a **clear, operational understanding** of digital sovereignty. Through expert-led sessions, real-world examples, and a practical gap-mapping exercise, participants will identify sovereignty risks and define a phased roadmap aligned with national priorities and institutional capacity.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The ITU Academy is the International Telecommunication Union leading platform for capacity development initiatives.
