Workshop on Regulatory Innovation Mechanisms

Organized by:

Supported by

Funded by
the European Union

Training details

Modality: Face to Face

Location: , Belize

Dates: 25 Mar 2026 - 26 Mar 2026

Training fees: \$0.00

Language: English

Application deadline: 15 Mar 2026

Training code: 26WS500459AMS-E-D

Contact: carlos.lugo-silva@itu.int

Training description

The Digital Alliance between the European Union and Latin America and the Caribbean (EU-LAC) represents a strategic commitment to promote an equitable, inclusive, and people-centered digital transformation across both regions. Within the framework of the Global Gateway strategy, the European Union is fostering significant investments in digital infrastructure in Central America and the

Dominican Republic, with the objective not only of expanding access to technology, but also of ensuring the adoption of international standards related to gender equality, human rights, and environmental sustainability.

In this context, the International Telecommunication Union (ITU) leads the Regulatory Innovation Project, aimed at supporting beneficiary countries in modernizing their regulatory frameworks and adopting innovative regulatory approaches, such as regulatory sandboxes, innovation laboratories, and regulatory experimentation centers. These mechanisms are essential to respond agilely to rapid technological change, foster innovation, attract private investment, and strengthen economic and social development. The project is implemented through the design and deployment of flexible and adaptive regulatory frameworks, the strengthening of technical and institutional capacities, and the implementation of advanced regulatory experimentation tools.

These actions not only contribute to regulatory modernization but also ensure alignment with international standards and best practices. Within this effort, Public Utilities Commission (PUC) play a key role by promoting open collaboration spaces with the private sector and other digital ecosystem stakeholders. This collaborative approach facilitates the co-creation of regulatory solutions, encourages the adoption of emerging technologies, reduces regulatory risks associated with innovation, and strengthens an enabling environment for investment and sustainable development in the telecommunications sector.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
