Africa–Europe Broadband Mapping Policy Training (WATRA)

Organisé par:

Supported by

National Authority for Management and
Regulation in Communications of Romania

Funded by
the European Union

Détails de la formation

Modalité: Online instructor led

Dates: 19 May 2026 - 21 May 2026

Frais de formation: \$0.00

Langue: English, French

Date limite d'inscription: 18 May 2026

Code de formation: 26OI500524MUL-E-D

Contact: danajon.kamason@itu.int

Description de la formation

The training aims to strengthen the policy, legal and regulatory capacities of the eleven national authorities responsible for broadband mapping governance and data-driven connectivity planning. This training is open also to external NRAs. The training will examine regulatory frameworks that enable national broadband mapping systems, including legal instruments for telecommunications data collection, governance arrangements between regulators and operators, and institutional coordination mechanisms. Particular attention will be given to regulatory challenges encountered in

establishing broadband mapping obligations and ensuring the quality, transparency, and sustainability of geospatial connectivity data.

The training will combine European and African experiences. The host country European national regulatory authorities will present case studies on the implementation of broadband mapping systems, including lessons learned from the adoption of EU directives and national legislation governing telecommunications data reporting. African participants will present national contexts, highlighting current policy frameworks, and regulatory constraints and implementation challenges identified through the Africa-BB-Maps policy analysis process.

This training will be held online and participants will virtually audit the sessions held in the BB-Maps [Face-to-Face training](#)
