Accelerating digital public infrastructure with safeguards

Organized by:

Funded by

Global Gateway

Training details

Modality: Online instructor led
Dates: *28 Jul 2026 - 25 Aug 2026*
Training fees: $0.00
Language: English
Application deadline: 05 Jul 2026

Training code: 26OI500540MUL-E-D
Contact: ituacademy@itu.int

Training description

Digital Public Infrastructure (DPI) is emerging as a leading approach for national digital transformation, built on reusable components, interoperable standards, and open architectures that prevent vendor lock-in.

This course equips government implementers and digital practitioners with a "Safeguards-by-Design" framework to build resilient, trust-based systems. Participants will develop the technical, legal, and institutional capabilities required to deploy inclusive Digital ID and secure Data Exchange systems at scale.

Through an intensive capstone, teams work in country simulations to navigate trade-offs between innovation and citizen protection, producing a national DPI strategy covering consent-based architectures, data minimization, and sustainable financing.

By the end, participants will be able to articulate the DPI value proposition, design safeguards, navigate governance, and mobilize investment for implementation.

With the generous funding from the Global Gateway initiative of the European Union, this course is offered for free for selected participants.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page here.

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account here
2. Apply for the course here
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.
