Africa–Europe Broadband Mapping Policy Training Workshop (CRASA)

Organized by:

Supported by

Funded by
the European Union

Training details

Modality: Online instructor led

Dates: 09 Jun 2026 - 11 Jun 2026

Training fees: \$0.00

Language: English

Registration deadline: 09 Jun 2026

Training code: 26OI500550MUL-E-D

Contact: danajon.kamason@itu.int

Training description

The training aims to strengthen the policy, legal, and regulatory capacities of the national authorities responsible for broadband mapping governance and data-driven connectivity planning. For this workshop, participants will include representatives from Botswana, Malawi, Zambia, Zimbabwe, and

CRASA in its capacity as the regional NRA.

The training examines the legal, policy, and institutional frameworks required to establish and strengthen national broadband mapping systems. It focuses on telecommunications data collection powers, governance arrangements between regulators and operators, and the coordination mechanisms needed to support accurate, sustainable, and policy-relevant broadband mapping. Attention is also given to regulatory challenges encountered in designing broadband mapping obligations and ensuring the quality, transparency, and long-term sustainability of geospatial connectivity data.

The workshop training combines European and African experience. The host-country experts present case studies on the implementation of broadband mapping systems in the European context, while participants from the attending African countries present their national situations, highlighting current policy frameworks, regulatory constraints, and implementation challenges identified through the Africa-BB-Maps policy analysis process.

Through case studies, peer learning, and three regulatory simulation exercises, participants will test policy responses to real-world scenarios involving the design of national reporting and QA/QC frameworks, cross-border interoperability and metadata harmonisation, and regulatory enforcement, appeals, and institutional credibility.

The Africa BB-Maps Policy Training is organized within the framework of the ITU–EU Africa BB-Maps initiative, which supports the development of national broadband mapping systems across eleven participating African countries.

This training will be held online and participants will contribute to discussions virtually through online discussion channels as well virtually audit the sessions held in the BB-Maps Face-to-Face training.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to register

In order to register for the training, participants should:

1. Create an ITU Academy account [here](#)
2. Register for the course [here](#)

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.

International Telecommunication Union
Place des Nations, 1211 Geneva 20
