Training details

Modality: Face to Face

Location: Geneva, Switzerland

Dates: 26 Oct 2026 - 30 Oct 2026

Training fees: \$0.00

Language: English

Application deadline: 15 Aug 2026

Training code: 26WS500552MUL-E-D

Contact: alex.hogback@itu.int

Training description

This course is designed for policymakers, educational and telecommunications regulators, government officials, and ICT professionals eager to leverage emerging satellite technologies to enhance school connectivity. It focuses on satellite broadband as a core infrastructure solution to bridge the digital divide in education and ensure sustainable internet access for remote and unconnected schools.

While maintaining a solid technical foundation, the main goal of the course is to provide participants with a comprehensive understanding of satellite access technologies—including LEO, MEO, and GEO constellations—as well as their specific deployment frameworks, financing models, and regulatory policies tailored to educational networks on a global scale. By the end of the course, participants will have gained both the technical knowledge and strategic insight required to assess, plan, and implement sustainable satellite-based solutions for schools in their countries. They will be equipped to design public policies, manage total cost of ownership (TCO), and optimize internet delivery for classrooms in alignment with global spectrum policies and international best practices.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
