

## Registration information

# Africa–Europe Broadband Mapping Study Visit and Policy Training Workshop (EACO)

Organized by:

Supported by

Funded by  
the European Union

## Training details

**Modality:** Face to Face

**Location:** Warsaw, Poland

**Dates:** 30 Jun 2026 - 02 Jul 2026

**Training fees:** \$0.00

**Language:** English

**Registration deadline:** 18 Jun 2026

**Training code:** 26WS500554EUR-E-D

**Contact:** [danajon.kamason@itu.int](mailto:danajon.kamason@itu.int)

## Training description

The aim of this training is to strengthen the policy, legal, and regulatory capacities of national authorities responsible for broadband mapping governance and data-driven connectivity planning. Participants will include representatives from Kenya, Ethiopia, Uganda, Burundi, and EACO in its capacity as the regional NRA.

The course examines the legal, policy, and institutional frameworks required to establish and strengthen national broadband mapping systems. It focuses on telecommunications data collection powers, governance arrangements between regulators and operators, coordination mechanisms, and the regulatory challenges involved in ensuring the quality, transparency, and long-term sustainability of geospatial connectivity data.

Through a combination of European and African experiences, host-country experts will present case studies on the implementation of broadband mapping systems in the European context, while participants from the attending African countries will present their national situations, highlighting current policy frameworks, regulatory constraints, and implementation challenges identified through the Africa-BB-Maps policy analysis process.

Through case studies, peer learning, and three regulatory simulation exercises, participants will test policy responses to real-world scenarios involving the design of national reporting and QA/QC frameworks, cross-border interoperability and metadata harmonisation, and regulatory enforcement, appeals, and institutional credibility.

Remote participants will be able to audit the sessions online and contribute to discussions virtually through online discussion channels.

The Africa BB-Maps Policy Training is organized within the framework of the ITU–EU Africa BB-Maps initiative, which supports the development of national broadband mapping systems across eleven participating African countries.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

## How to register

In order to register for the training, participants should:

1. Create an ITU Academy account [here](#)
2. Register for the course [here](#)

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
