#### Training description

This course provides government officials, project managers, and public sector professionals with a practical foundation in project and grant management for school connectivity. Through concise instructional content, interactive activities, and scenario-based exercises, participants will learn how to initiate, plan, implement, monitor, and close school connectivity projects while managing stakeholder expectations, project risks, donor requirements, and financial compliance. The course introduces key tools and frameworks such as the Project Canvas, Project Charter, Work Breakdown Structures, Gantt charts, bottom-up grant budgets, risk registers, probability–impact matrices, results chains, and monitoring, evaluation, and reporting frameworks. Participants will also explore how to

develop realistic schedules and budgets, design stakeholder engagement and communication plans, apply change control and accountability principles, and plan for sustainability beyond donor funding. The course concludes with a Capstone Application Project in which participants apply the tools and frameworks learned to a representative school connectivity scenario.
