Digital Transformation and Regulation Training for the CIS Region

Organized by:

Training details

Modality: Blended

Dates: 14 Dec 2026 - 15 Dec 2026
Training fees: \$0.00
Language: English, Russian
Registration deadline: 30 Oct 2026
Training code: 26BL500591CIS-E-D
Contact: Natalia.Mochu@itu.int

Training description

This two-day training course is designed to strengthen the capacity of policymakers, regulators and relevant public institutions in the CIS region to address key policy and regulatory challenges related to digital transformation.

The course is based on ITU approaches and tools for digital regulation and digital transformation, including the ICT Regulatory Tracker, the G5 Benchmark, the Digital Readiness Framework, the ITU Digital Regulation Platform, and relevant ITU tools for connectivity, digital infrastructure planning, investment assessment and data-driven connectivity planning.

The training will focus on the transition from traditional ICT regulation to broader, collaborative and evidence-based digital regulation. It will examine how regulatory frameworks, governance mechanisms and policy tools can support inclusive, trusted and sustainable digital transformation.

The course will combine instructor-led presentations, peer learning, country reflection exercises and practical discussions. It will enable participants to assess national strengths, identify regulatory and institutional gaps, and define priority actions for further capacity-building and regulatory reform.

The training will be organized by ITU in collaboration with the Digital Regulatory Academy (DRA) of the Communications, Space and Technology Commission (CST) of Saudi Arabia, as part of ITU-Saudi Arabia Project on Assistance in telecommunication/ICTs to ITU regions. The training will be hosted by the Information Communication Technologies Agency (ICTA) of the Republic of Azerbaijan.

This training will be conducted in English and Russian with interpretation.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to register

In order to register for the training, participants should:

1. Create an ITU Academy account [here](#)
2. Register for the course [here](#)

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
