Training fees: \$0.00

Language: English

Registration deadline:

Training code: 26WS500595ARB-E-D

Contact: khadija.hamouchi@itu.int

Training description

The Arab region is home to one of the world's youngest populations, yet young people remain under-represented in the processes that shape ICT and telecommunications policy. This three-day, face-to-face bootcamp, delivered by the ITU Regional Office for the Arab States in collaboration with the Ministry of Communications of Djibouti, equips young Djiboutian participants with essential diplomacy skills for 21st-century technologies._

Participants learn the foundations of technology diplomacy, policymaking, negotiation and consensus-building. They then put these skills into practice by reviewing a mock-up Meaningful Engagement Policy and Strategy for Arab Youth in the ICT and Telecommunications Sector (2026–2031), deemed as the first youth-led policy framework of its kind in the Arab States and the UN system. Working in breakout groups, they review and refine policy actions across five pillars to find consensus among five stakeholder groups. Through debates, role-play and group presentations, participants leave with practical skills, a concrete policy contribution and a place in a regional network of young Arab technology leaders.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).
