Training description

This workshop targets staff with a technical background and holding technical jobs as well as IT officers. The workshop is also addressed to staff of regulators, operators and other service providers who are at the beginning of their career in IT security and digital forensics and who are eager to reinforce their knowledge on a number of issues related to cybersecurity.

For more information about the training objectives, target population, entry requirements, methodology, evaluation and content, consult the page [here](#).

How to apply

In order to register for the training, applicants should:

1. Create an ITU Academy account [here](#)
2. Apply for the course [here](#)
3. The selection of participants for the course will be made by the course coordinators, based on the course's entry requirements, selection criteria and available number of seats. If selected, you will receive a notification by email.

The [ITU Academy](#) is the International Telecommunication Union leading platform for capacity development initiatives.
