

Quick Dive into Innovation Practices:

Ideas Worth Stealing 🤔

ITU Academy Training Centre-Mauritius

23 April 2026

Name of the practice

1. Scenario-Based & Simulation Training

- Context in which you apply it: For training delivery
 - Especially valuable for **cybersecurity training**
 - Makes learning **interactive and engaging**
- What problem it solves
 - Brings clarity to the concept building
 - Easier to understand
- How it works
 - Build the simulation environment for the participants using dedicated infra.
- Why it works (evidence it works)
 - Feedback during the training on this practice was very positive.
- Biggest limitation
 - Participants need to have basic understanding of the environment used for simulation.
- If you want to try it, my advice is*:

It is very useful and gives a flavor of hands on training.

Description of the practice

- **Scenario Presentation** – A realistic situation or incident is introduced
- **Decision-Making** – Participants assess risks and choose actions
- **Simulation Execution** – The scenario evolves based on their decisions
- **Feedback & Reflection** – Outcomes are analysed to reinforce learning
